

Town of Vermilion

Waste Collection Information (Roll out Bin Pick-up Only)

Placement of your bin

The bin requires approximately one meter on all sides so the automated truck can lift it. Place the wheels of the bin facing parallel with the curb and the metal bar parallel with the road, as illustrated in picture #1. Where there is no curb, place the bin on the edge of the traveled portion of the roadway. When there is a snow bank built up along the curb, make sure the bin is out further than the snow bank. We ask that you refrain from parking on the street on collection days, however, if there are vehicles on the street, please place the bin in the location illustrated in picture #2. When you are close to your neighbors bin please allow enough room between the two as illustrated in picture #3. Pictures #4, 5 & 6 show the incorrect ways of putting out your bin. Sidewalk placement is not an option.

Collection of your bin

To assure that your bin is picked up regularly please follow the pictures and have your bin out by 8:00 am on your collection day. All garbage must be bagged. It is best to not have your bin out for collection more than 24 hours prior to your collection day and remove all empty bins within 24 hours after collection. On occasion, we may not be able to provide service due to various reasons, such as improper placement of the bins or bins placed out after the truck has passed by. The Collection Operator will not collect any garbage not in the bin.

Storing, damaged, lost or stolen bins

Bins are the property of the Town of Vermilion and must remain with the property if you move. Each bin has a serial number on it that is corresponding with the property and helps to return a bin if it is lost and found. Bins may be stored anywhere on your property - in your garage, by your house or garage or in a shed. (preferably a shaded, cool spot.) If your bin requires repairs that is due to normal use over time please call the Engineering & Public Works Department. Bins may not be altered or painted. Bins that are damaged by improper use or abuse will be subject to a replacement cost of the bin being the responsibility of the home owner.

If you require further information, please call the Town office at 780-853-5358, Monday through Friday, 8:30 am – 4:30 pm.

Town of Vermilion

Waste Collection Information (Lane Collection Only)

A steel container will be placed in the lane to serve several homes. Care will be taken so that everyone has easy access to it. A notice will be left to tell you when to start using it.

Garbage should be placed in sturdy plastic bags. Boxes should be flattened to take up less space. Keep the lid shut.

The Town provides the container. It's up to you and your neighbours to help take care of it. If a container is willfully damaged, offenders will be assessed for the repair costs.

The container means cans and lids won't be rolling around. You won't have to worry about special stands or buy cans. With good neighborly cooperation, our back lanes will be clean and safe.

Important General Information

Automated Waste Collection will save everyone money, provide better service, is safer for all, and will keep Our Town Beautiful.

Community cooperation in adapting to the system is requested.

Please remember that once you have a new container, cans used now cannot be emptied. Boxes and loose garbage bags cannot be collected.

Automated waste collection means one person in one truck collects all waste containers in the area. The driver does not leave the truck. A lifting mechanism grasps the container, lifts it up, empties it and replaces the container in the same spot.

Flammable materials such as gas, oil, paint, hot ashes or construction debris are not allowed. Dirt, sod, or rocks, furniture, mattresses, large appliances, vehicle parts are not allowed.

For more information on the proper method of disposing hazardous materials, please contact the Town of Vermilion Landfill at 780-853-45752.
