

# Location of Town of Vermilion "Green Bins" for your Organic Wastes

B = Green Bin

T = Town Public Works Yard

Green bins are intended to receive grass clippings, garden wastes and leaves only. A regular "Garbage Can" found near the Green Bin is for plastic bags and other containers used to carry the grass and leaves to the Green Bin. All other wastes should be placed in the garbage for normal pick up. Delivering your yard and garden wastes to a Green Bin near you (see map) or to the storage site at the Town Public Works Yard, is helping reduce the amount of material being hauled to the Vermilion Regional Transfer Station and making the Town more environmentally friendly.
